CERTIFICATION AT A GLANCE

In order to be a Certified Composting Professional™ (CCP™), an individual must:

1. Complete the application
2. Meet the eligibility requirements
3. Take and pass the CCP™ test
4. Receive your certification
5. Maintain your certification through ongoing education.

TEST ELIGIBILITY REQUIREMENTS

1. Experience: Minimum of 4 years of full time experience related to composting facility design, implementation and/or operations.
2. Training in Compost Operations: At least 5 days of training, including one course of at least 3 days in compost operations
3. Education: Graduation from high school or GED
4. Age: 21 years of age or older

WHO WE ARE

The US Composting Council created the Certification Commission (USCC) as a quasi-independent body with a mission to develop and administer national, valid, credible, vendor neutral certification programs for organics recycling professionals to enhance the profession of organics recycling facility management which, in turn, benefits the community’s business and environmental outcomes. The Commission researched and built its program based on data from the field that reflects the knowledge, skills, performance and expectations for facility managers and operators.

ANNOUNCING THE CERTIFIED COMPOSTING PROFESSIONAL™

ADVANCE YOUR CAREER TODAY!
WITH THE LATEST CREDENTIAL FROM THE USCC
The Certified Composting Professional™, or CCP™, is the newest in a series of compost manufacturing industry credentials being developed to recognize the accomplishments and competencies of composting professionals.

Our goal is to provide a process that will enhance the profession of composting facility management and benefit communities, businesses and environmental outcomes in the process.

If you have experience planning and implementing composting operations the CCP™ is an important part of your journey for lifelong success.

The Commission researched and built its program based on data from the field that reflects the knowledge, skills, performance and expectations for facility managers and operators.

**INTRODUCING A NEW CREDENTIAL DEVELOPED BY THE US. COMPOSTING COUNCIL CERTIFICATION COMMISSION**

- Be globally recognized across the industry.
- Enable composting professionals to demonstrate they have met specified criteria and achieved a level of understanding of and familiarity with compost manufacturing practices.
- Support companies and organizations in establishing best management practices and thereby achieving improved business and environmental outcomes.
- Advance composting facility operations by providing an improved career development path for compost professionals.

**HERE’S HOW YOU CAN PROVE IT!**

Be recognized for your knowledge and experience with the new CCP™.

Do you know what it takes to operate a compost facility? Maybe you never worked FOR one, but you’ve worked WITH many of them as an engineer, equipment provider, consultant, teacher or regulator?

**WHY GET CERTIFIED?**

If you have experience planning and implementing composting operations the CCP™ is an important part of your journey for lifelong success.
